

**Crash Rated Barriers, Gates, Fences and Bollards**

## **Attachable SecurGate™** patent pending

**CABLE LOOP CRASH BEAM**

Anti-Vehicular Security for Your Entrance Gates

### **Description**

Crisp's "Cable Loop" Attachable SecurGate™ is a simple, inexpensive counter intrusion system that is attached to new or existing sliding and/or swinging entrance gates to provide crash rated protection.

This gate consists of a uniquely designed light-weight high strength, closed-loop cable system that is horizontally attached to the gate, and bollard-type superposts which are set into the ground. This system is designed to specific widths and crash ratings up to (DOS K12). A crash rating certification will be provided.

### **Applications**

The system is ideal for use as an economical add-on to most sliding, swinging, or double when ease of installation and cost-efficiency is of prime importance. This device does not alter the operation (electrical, hydraulic, or mechanical) of standard gates and gate operators, and provides crash rated protection at a fraction of the

### **Installation**

This kit-based system is quick and easy to install utilizing non-technical labor and hand tools. Explicit drawings and instructions are provided with the product. If being attached to a customer provided gate, the gate's ability to carry the crash beam must be confirmed.

### **Maintenance**

The Attachable SecurGate™ materials are constructed of ASTM A-53 Grade A/B steel, hot dipped galvanized resulting in a virtually maintenance-free system.

### **Operation**

The Attachable SecurGate™ crash beam becomes an integral part of the existing gate and requires no activation by operator or remote sensor. When installation is complete, this system immediately provides vehicle crash protection.

### **Product Documentation**

- Detailed installation electrical drawings and instructions specific to each customer product
- Crash certification, warranty, and technical specification
- O&M Manual spare parts list - most parts are off-the-shelf

### **Ongoing Product Support**

- Timely Response to customer inquiries
- On-site installation oversight
- On-site maintenance and troubleshooting assistance
- Highly qualified support personnel who hold government security clearances
- Training of customer security and maintenance personnel

### **Features**

- Quickly and easily installed by non-technical personnel
- Kit-based, add-on system
- No maintenance required
- Utilized on manual, electrical, or mechanically operated gates
- Does not alter operation of gate
- Requires no activation by operator or remote sensor
- Provided with a hot dipped galvanized finish
- Powder coated or painted in over 300 colors
- Custom-built for use with any size sliding or swinging gate
- Can be used on double gates (any combination of swinging or sliding)
